2.4. Notes for Documentary

There have been 5 massive extinctions. A lot of animal activists die a day. We have killed 90% of sharks which predate. 5/6 of the gas production is made by cows farting. If all humans became vegetarians we would make a massive difference. There no point in fixing the world if you can't teach the future.

We're killing animals 50% fast because of coo, pollution, mass fishing. "humanity has become the asteroid. Refinery's leak oil. Some people fish because they have no other choice. Coo make the ocean acidic. Cows make methane.

You can research to solve problems. Electric cars are good, become vegan. Exposed the shark fin industry

6. Science

6.1. Bonding letter to future self

Dear Preston,

Elements form bonds to get a full octet. Energy is released when a bond is formed. There are three bonds ionic covalent and metallic. Ionic bonds conduct electricity, covalent donât. the molecule is polar if the dot diagram is asymmetric. a covalent bond is polar If there are two different elements. An ionic dot diagram is drawn by brackets and dots. Inter molecular force is a force between two molecules. Hydrogen bonds are strong.

6.2. Classifying Elements on the Periodic Table Note Catcher

What determines the properties of metals?

The way the electrons are distributed determines the chemical properties of the element

Summarize three properties of metals:

Ductile, the ability to be wire, luster, the shininess of a metal and temp in which is changes state.

What state of matter are almost all metals at room temperature?

Almost all metals are solid at room temperature.

Mercury is an exception.
